

# Chemistry

## **I am having trouble finding powdered drain cleaner or lye for Experiments 2.1, 9.1, 10.3, and 13.1 in Chemistry. What should I do?**

For experiment 9.1, you can substitute lye, which is sodium hydroxide. You will also need lye for experiments 2.1, 10.3, and 13.1. You can find lye by a simple internet search for caustic soda, lye, or sodium hydroxide.
