

Adapting a Young Explorer Notebooking Journal for Your Youngest Explorers

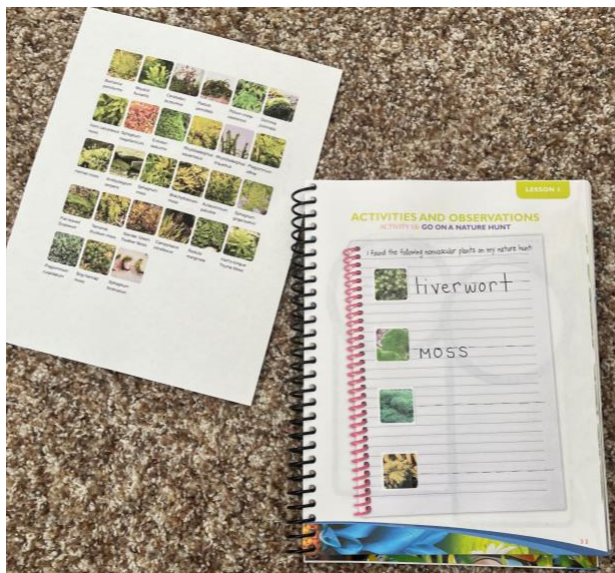

Even your youngest explorers can benefit from keeping their own Notebooking Journal and adapting it to fit their needs is as easy as 1 – 2 – 3!

Need Primary writing lines? Use a pencil to add the dashes to guide a younger student's handwriting.

Provide the first letter as a hint for answering questions found in the Notebooking Journal.

Print out materials that correspond to your area so that younger students don't need to research or draw materials for activities.
